## About me

I'm a result oriented front-end developer with experience in creating SPA, using React(JS/TS), Redux, Vue(JS) HTML & CSS. Now I am improving my skills in this direction and expanding them with new technologies. And also I have interest to learn React Native and Backend web development.

My free time is dedicated to Codewars, programming tutorials and boosting my English.

I am passionate about creating excellent software that improves the lives of the people around me.

I would like to find a project work/full-time job in a creative company with up-to-date task and collaborative team.
